

The European Post Production Connection - EP2C -

Berlin - 2010

What are we talking about ?

Post production stage is traditionally identified as

- Transformation of the film footage shot into a finished film
- From last day of principal photography to delivery of the copy
- Seen as very technical stage

EP2C : a updated definition of post prod process

Context : postproduction stage of international co productions

- Is a crucial element of the film production chain
- Requires specific management skills

Question to answer at early stage of production :

- When and how should I wonder about post production ?
